

# AIR BRIDGE

by **multiCAM**  
systems

## BE ONAIR FROM ANYWHERE!

Here is your new RADIO studio. With MULTICAM «AIR BRIDGE», join the show as a guest from anywhere. All you need is a laptop or smartphone. A cup of coffee helps too.

Create and remotely control your shows or conferences with MultiCAM AIR BRIDGE

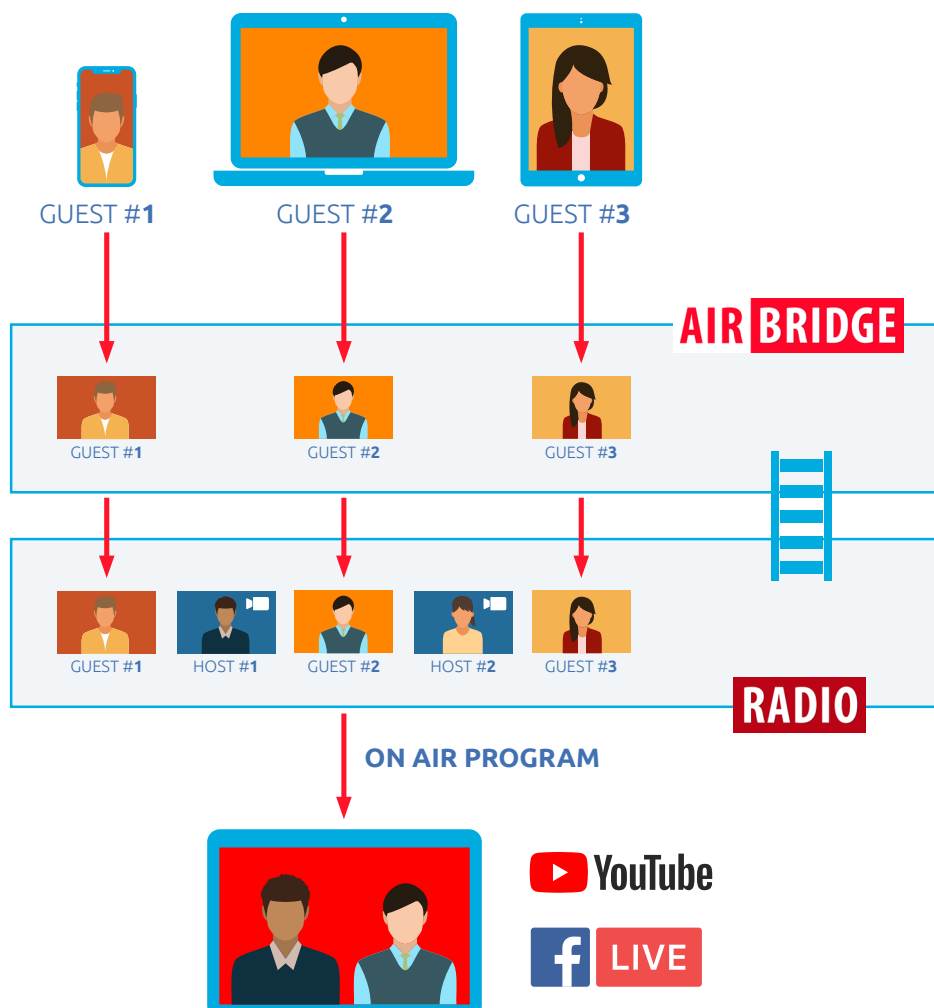

MultiCAM AIR BRIDGE lets you connect up to four remote guests, giving you full control over each guest's video and audio stream and delivering mix-minus audio feeds for each of the guests.

MultiCAM AIR BRIDGE is built using WebRTC – a modern web technology that lets your guests connect right from their browsers, with no installation or registration required. To bring a guest into your production, all you need is their email address. WebRTC has significant momentum behind it. It is heavily promoted by Google, and is already built into over half the browsers in use today (Chrome, Firefox, and Opera running on PCs, Macs, and Android devices)

# AIR BRIDGE

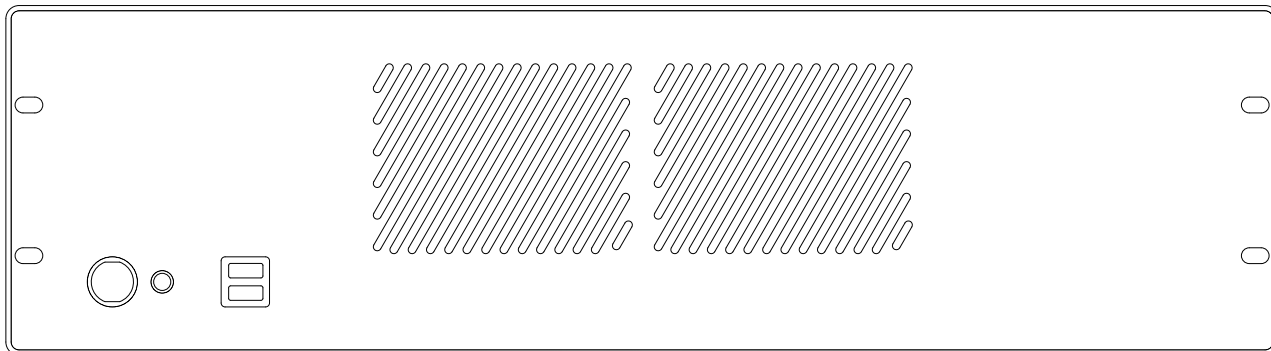

## KEY FEATURES:

- All-in-one solution with dedicated hardware
- Integrated with multiCAM workflow
- Up to 4 remote guests at the same time
- Full monitoring of all video/audio signals
- AoIP compatible
- NDI/SDI outputs
- Feedback with video program for guests
- Video call-ins management with queue
- Control of remote guest video settings (scale, position, picture)
- Automated mix-minus audio generated for all guests
- Adjustable audio delay for each guest channel

## HARDWARE SPECIFICATIONS:

We deliver the solution with a dedicated 3U server box

Unit dimensions: 482mm (19") W x 133mm (3U) H x 300mm D    Unit weight: 5,5 kg

### Video inputs/outputs

4x HD-SDI (in/out)

### Network

1x Gigabit LAN

**CPU:** Intel i7 8700

**RAM:** 8GB DDR4 ECC

**Voltage:** 220V 50-60Hz

### Data/Peripherals

- 1x 128GB SSD Hard Drive (System)
- 1x 1TB 7200rpm Hard Drive (Records)
- 2x USB 2.0
- 4x USB 3.0
- 1x 1/4" Headphones Jack

**OS:** Windows 10 Pro 64bits
