

MuZi – Multiformat Zentral Ingest

Multiformat
Virus and Network security
Mass Ingest
Central Processing
Status View and Notification

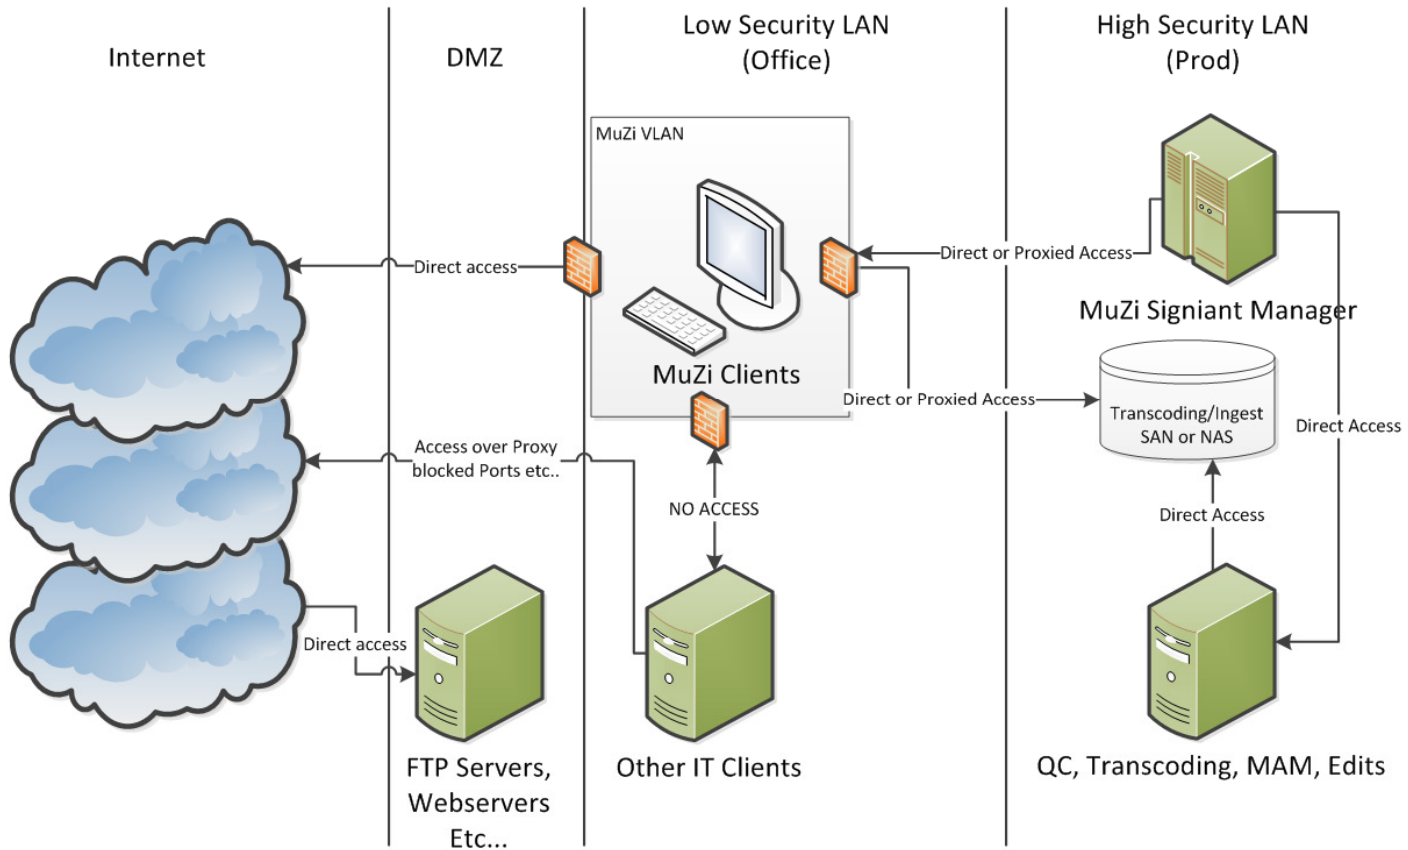

Security

- Enable „non-IT“ staff to read from unknown devices without risk (e.g. USB sticks)
 - Download anything from anywhere (e.g. Internet)
 - Ingest material from an infected device anyway (e.g. urgent news footage)
 - Get rid of any possible virus infection by rebooting only
-

Security Diagram

Network Security overview

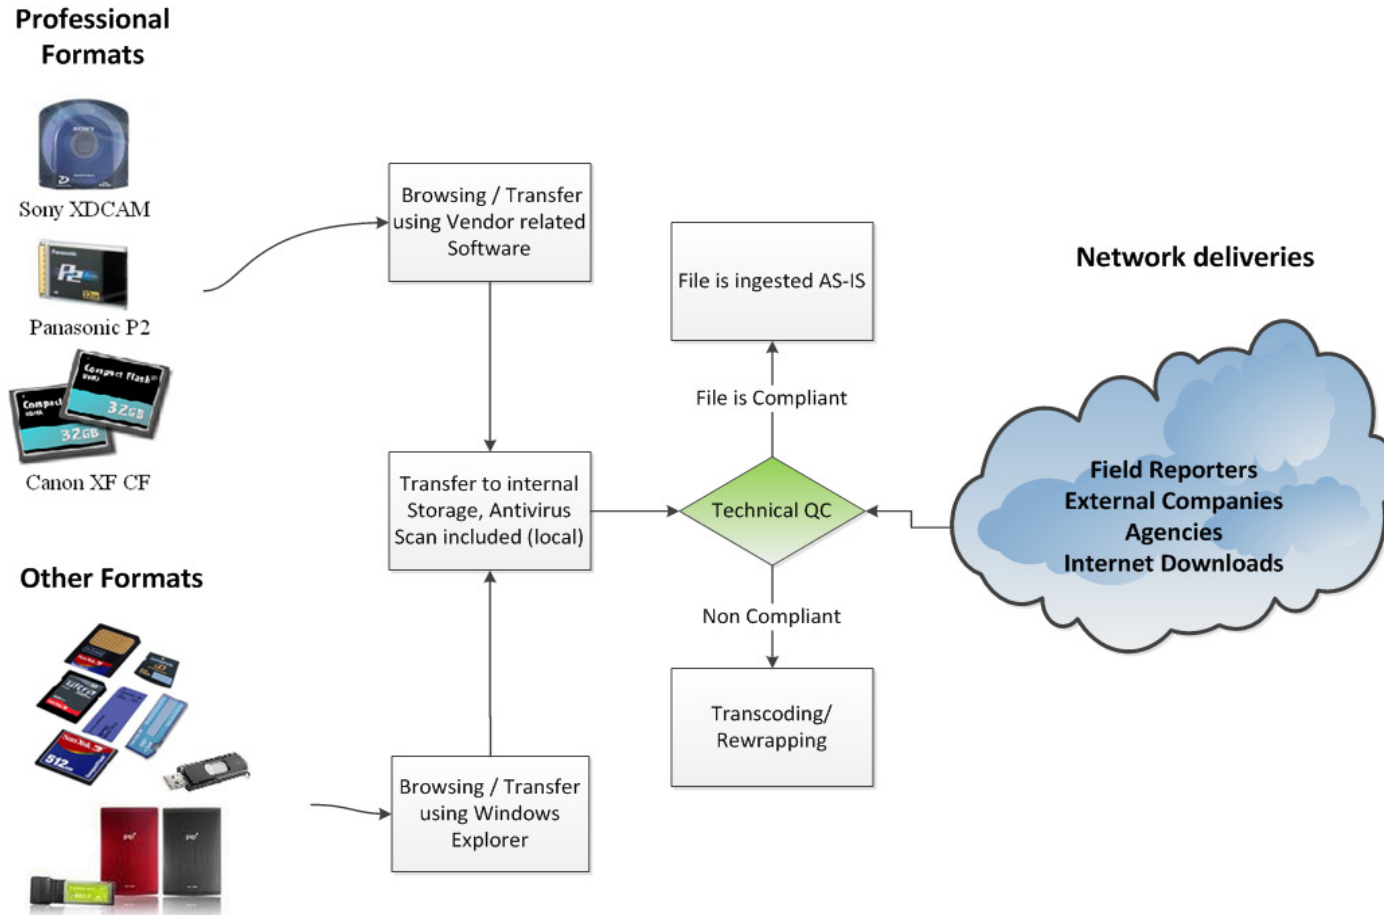

Multiformat

- Process all kinds of different Media Sources
 - USB Stick
 - Professional data device (XDCAM etc...)
 - Internet downloads
- Whilst obeying IT security rules
 - OS level (reboot to get rid of infection)
 - Network level (special locked-down MuZi VLAN)

Multisource and Multiformat

Mass Ingest

- Process multiple hundreds of Assets from e.g. an USB drive in highest possible speed
- Requirements for Mass-Ingest
 - Process hundreds of Items at highest possible speed
 - Allow detection of failed Assets by providing a process overview

Central Processing

- MuZi always Includes a customized OEM version of the Signiant Workflow Manager
 - Options for Processing:
 - Use your existing Transcoding/QC server farms
 - Use your MuZi for Workflow, QC and transcoding (single machine only, most simple workflows)
 - Use a bunch of MuZi machines as a Workflow/QC/Transcode Cluster
-
